

The road to the future

The future we want

2030: Climate awareness is high among school children

Building a curriculum that captures scientific foundation and practical aspects of climate change and integrating local and indigenous farming knowledge

Emergency and disaster response policy in education

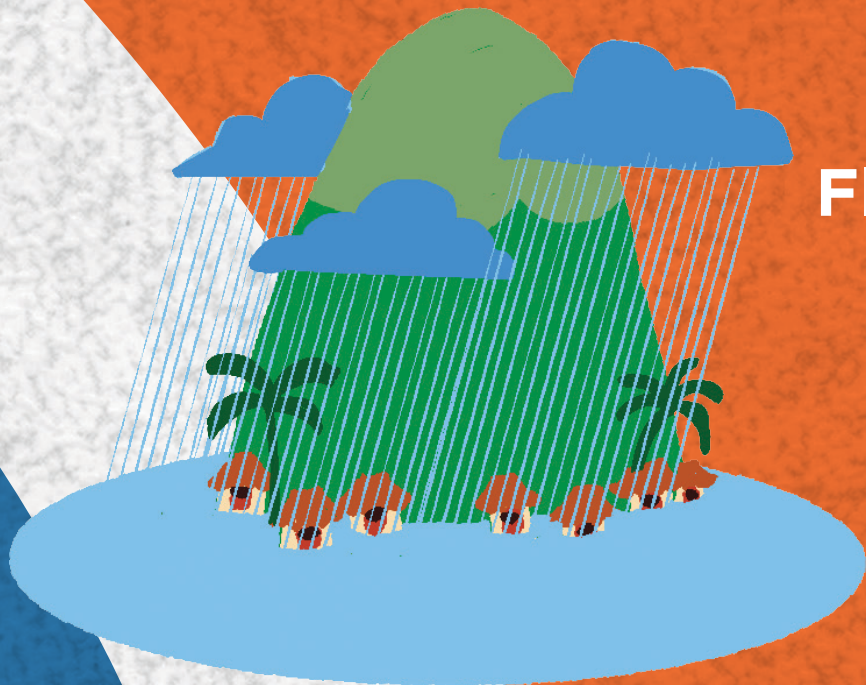

Climate change impacts on education

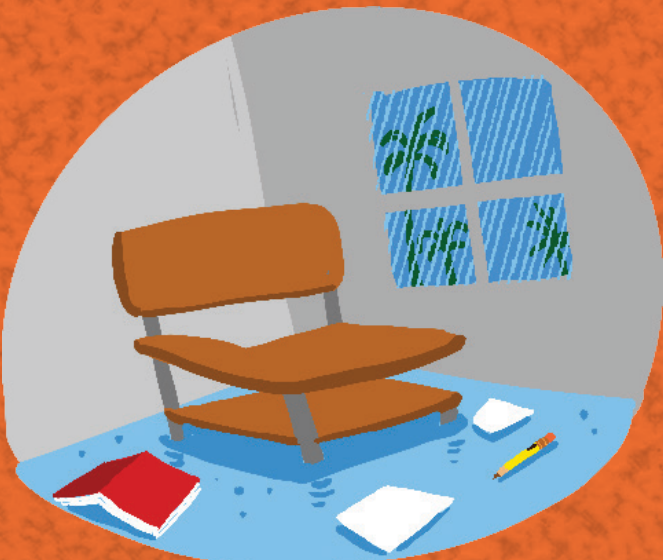

80% of the population live on islands

Schools in outer islands are becoming more difficult to reach due to extreme weather

Flooding causes disruption in already inaccessible schools

Rising sea levels in the classroom

Teachers are trained and well-resourced.

Climate change education as priority area in National Education Policy

Papua New Guinea

MAPPING TRANSFORMATIVE CLIMATE CHANGE EDUCATION

Education celebrates the diversity of the country
