

The road to the future

SAMOA EDUCATION NETWORK

Establish education policies on climate change education

Develop contextualized learning resources based on Samoan Indigenous knowledge

Youth empowerment through action-based research

Engage with Pacific Climate Change and Migration project

The future we want

2030: Climate literacy, traditional knowledge, youth empowerment in all levels of education

Schools become climate resilience hubs

Teachers are trained and well-resourced

Preservation of the Samoan way of life in the face of the climate crisis

Climate change impacts on education

Climate change is threatening the right to education

Rural areas lacking in infrastructure are affected worse by climate change

Teacher shortages are amplified during disasters

Climate change widens gender inequality among students

Samoa

MAPPING TRANSFORMATIVE CLIMATE CHANGE EDUCATION
